

Your nails. Your words. You print them.

A Read My Nails session is a lesson. The host shows every step on a practice tip; you do it on your own nails. About 12 minutes for one hand.

1

Pick your set

From the book, the salon’s tablet, or build your own on the screen. You get a code.

2

Cleanse

Wipe each nail with the pad. You do it — the host shows you on a practice tip.

3

Base coat

Thin coat, stay off the skin. Hand in the lamp, 60 seconds.

4

Mask

Paint the skin around the nail. That’s what keeps ink off your finger.

5

Print gel

One thin coat. Don’t cure — this is what the ink sticks to.

6

Print

Finger on the rest, nail flat, hold still. About 40 seconds a nail.

7

Peel & top coat

Peel the mask like a sticker, brush the top coat, lamp 60 seconds.

8

Hold it up

Can they read it? Photo, tag the salon.
